# GOP Slate Plans To Move New London Forward

## GOP Slate Plans To Move New London Forward

Published on 8/11/2009 in [Home](#) » [Editorial](#) » [Letters to The Editor](#)

During the past two years, New London has seen measurable improvement despite a worsening economy. Public safety has been advanced with significant investment, additional market-rate housing is being developed, two new schools are being built and infrastructure improvements are under way; all this with no increase in required taxes this year.

We are running for re-election to the City Council to maintain this level of success and build upon it with the help of other Republicans running for City Council and Board of Education. We are keeping an open dialogue with residents and business owners, doing our due diligence in researching issues, and working with our fellow councilors when we agree and proposing alternatives when we do not.

Elect members of the GOP slate. If given the opportunity, the GOP will strive to save taxpayer dollars by further consolidating city services including those currently provided by the city and schools, improve our attractiveness for development through continued infrastructure enhancement, and continue the advancements in public safety and education.

On Nov. 3, please add to a proven team. Vote Row A and keep New London moving forward.
